NATHANIEL STEPHENSON

DevOps Engineer / Site Reliability Engineer

PROFESSIONAL STATEMENT

IT professional with 10 years of experience in DevOps engineering, bringing strong technical expertise, meticulous attention to detail, and a broad skill set across multiple platforms and technologies. An effective communicator with excellent written and verbal skills, adept at translating complex technical and software-related issues into clear, accessible solutions for both technical and non-technical stakeholders. A proactive and results-driven professional committed to applying extensive IT expertise to deliver meaningful business value, while continuing to expand technical capabilities and progress within a forward-thinking organisation.

WORK EXPERIENCE

DevOps | The Access Group

12 - May - 2023 | Current

Responsibilities: [On call Support]/ [Support tickets]/ [Automate manual processes]/ [Vulnerability Management]/ [Onboarding]/ [Audit Management]/ [Release Management]

Tools: Datadog / PagerDuty/ VS Code/ AWS/ Azure / Terraform/ AzureDevOps/ Cloudflare/ Azure DevOps/OctopusDeploy/ Teams/ SSMS/ Claude Code

Accomplishments:

- Managed vulnerability remediation across company products, including identifying and resolving security issues within legacy systems.
- Optimised Octopus Deploy pipelines and developed automated deployment processes to improve release efficiency and reliability.
- Managed AWS EC2 infrastructure, including instance provisioning, configuration, monitoring, maintenance, and troubleshooting.
- Implemented monitoring and observability solutions alongside end-to-end operational support processes.
- Integrated New Relic and Datadog monitoring agents with PagerDuty to improve alerting, incident detection, and response.
- Monitored and managed AWS cloud expenditure, producing quarterly cost and usage reports to support cloud cost optimisation.
- Created and maintained operating system baselines, maintenance windows, and monthly product maintenance schedules.
- Utilised Anthropic AI tools to assist with the development of reporting solutions and accelerate technical troubleshooting.
- Integrated new projects and applications into Azure DevOps, supporting build and deployment workflows.
- Provisioned and administered secure SFTP accounts for clients.
- Managed production and non-production product releases, including deployment execution, validation, and troubleshooting of deployment failures.

KEY SKILLS

- + Time Management and Prioritization:
Exceptional ability to manage time effectively and prioritize tasks.
- + Analytical with High Attention to Detail:
Strong analytical skills with keen attention to detail.
- + Multitasking and Conflict Management:
Proficient in multitasking and handling.
- + Communication: Excellent presentation and communication skills.

PROF. SKILLS

EVENTS

London Tech Week:
CLOUD & DevOps WORLD SUMMIT:
PART OF TECHXLRB
<https://londontechweek.com/>

It brought together the industry's leading technologists and innovators to discuss cloud innovation, DevOps, container deployment, Kubernetes serverless architecture, automation, securing your cloud and much more.

EXPERIENCE (CONTINUED)

- Supported the onboarding of new team members by developing and maintaining technical documentation, procedures, and operational guidance.
- Developed automation solutions using Rundeck and Octopus Deploy to reduce repetitive operational tasks and improve process consistency.
- Monitored and responded to operational alerts, performing initial remediation and escalating unresolved incidents to BAU/support teams where required.
- Utilised Anthropic AI tools to assist with the development of reporting solutions and accelerate technical troubleshooting.
- Integrated new projects and applications into Azure DevOps, supporting build and deployment workflows.
- Provisioned and administered secure SFTP accounts for clients.
- Implemented and evaluated a proof-of-concept Web Application Firewall (WAF) solution using Cloudflare to assess application security and protection capabilities.

SRE | NLA MEDIA-ACCESS

23 - Jan - 2023 | 12 - May - 2023

Responsibilities: [On call Support]/ [Support tickets]/ [Automate manual processes]/ [Migrate legacy technologies]

Tools: Datadog / PagerDuty/ VS Code/ GCP / Azure / Terraform/ GitHub/ GoDaddy/ Azure DevOps/ Jira/ Slack/ SSMS/ IPMON/ EFT Server

Accomplishments:

- Implemented Infrastructure-as-Code (IaC) practices for adding services and monitoring alerts.
- Developed and deployed Azure builds with Packer and ADO pipelines.
- Optimized Datadog logging and monitors in Terraform for improved log capture.
- Generated reports on existing Database logging schedules for better visibility and analysis.
- Enhanced Azure VM performance by scaling up HD volumes and RAM resources.
- Integrated Slack channel with PagerDuty alerting system via Azure Runbook.
- Contributed knowledge base content to ADO wiki, providing valuable resources.
- Proficiently managed FTP accounts using EFT Server for file transfer operations.

DevOps/ SRE | EQUIFAX

04 - Feb - 2021 | 23 - Jan - 2023

Responsibilities: [Monitor application performance] / [Automate manual processes] / [Reporting issues for development prioritization] / [Migrate application (AccountScore) from on-prem to the cloud (GCP)]

Tools: Datadog / AppDynamics/ PagerDuty/ VS Code/ VS2019/ GCP/ Terraform/ Jenkins/ GitHub/ Rackspace/ Google chat/ Jira

Accomplishments:

- Oversaw identification and resolution of vulnerabilities in on-premises devices and GCP instances.
- Conducted comprehensive vulnerability assessments using C3M, Qualys, Fortify, SentinelOne, and implemented effective remediation strategies.
- Utilized Groovy pipelines to streamline code and deployment processes.

PROJECTS

- VIPR Solutions Walkthrough Project:

[HTTPS://NSVIPROOLUTIONS.TUMBLR.CO
M/](https://nsviprosolutions.tumblr.com/)

Password: Qwerty123

Index Project - AI project

EXPERIENCE (CONTINUED)

- Successfully managed GCP instances, including monitoring health conditions, reviewing error logs, and managing user permissions.
- Updating SAN certificates for IIS sites
- Configured and optimized monitoring platforms (Datadog and AppDynamics) for efficient alerting and escalation.
- Efficiently handled service requests through Service Now for network firewall implementation, whitelisting, and UAT deployments.

DevOps Engineer | AccountScore

08 - May - 2018 | 04 - Feb - 2021

Responsibilities: [Upgrade CI/CD processes]/ [Automate manual processes]/[Migrate legacy technologies]

Tools: Octopus Deploy/ Jira/ SSMS/ Build Master/ VS2019/ Jenkins/ Rackspace

Accomplishments:

- Proficiently configured Octopus Deploy, including creating variables, customized build steps, version channels, tentacle configurations, lifecycles, and software updates.
- Utilized PowerShell for various automation tasks.
- Developed and implemented business Continuous Integration using Jenkins and Octopus Deploy.
- Built the main solution of the business using Jenkins for efficient software development processes.
- Managed the entire deployment lifecycle, ensuring smooth transitions to production environments.
- Created build.bat files to facilitate building MS Build and Dotnet projects.
- Utilized New Relic for proactive monitoring of server and application health.
- Leveraged SVN Repository as the source of development commits for version control.

DevOps/ DBA/ 1st & 2nd Line Support/ Software tester | VIPR Solutions

16 - Mar - 2016 | 08 - May - 2018

Responsibilities: [Support tickets]/ [Deploy releases]/ [Managing 2008/16 Servers]/ [Software testing]/ [Client Demo]

Tools: Octopus Deploy/ Team City/ SSMS/ Jira/ Atlassian

Accomplishments:

Junior DevOps:

- Managing the configuration and deployment of Octopus Deploy e.g. installing tenants, creating releases, and amending the deployment cycle.
- Understand complex software requirement specifications.

Junior DBA:

- Creating and generating scripts using transact SQL.
- Managing client data to maintain software performance.
- Writing SQL queries.

Helpdesk (1st Line Support):

- Responsible for logging and prioritising reported client issues in JIRA.
- Manage / Create confluence pages through Atlassian.
- Communicating with team and client daily for feedback on reported issues.
- Creating filters to produce service desk reports in JIRA.

2nd Line Support:

- Investigating client-reported tickets.
- Server 2008 RS Maintenance checks.
- Use 'Team City' for software packaging for client installation.

Junior Software Tester:

- Able to take a methodical and logical approach to testing software.
- Testing software in client environment DEV, UAT and in rare events live.
- Making decisions based on assessing risk.

EDUCATION

ANIMATION & COMPUTERIZATION | DEGREE

BA HON 2:1

University | Ravensbourne University
12 - Sep - 2013

MATHS / ENGLISH/ SCIENCE | GCSE

Grade: C

School | Edenham High School
08 - June - 2006

BTEC FIRST DIPLOMA | GCSE

4 GCSE - Grade: MERIT

School | Wandsworth City Learning Centre
08 - June - 2005

CompTIA A+ ESSENTIALS | COURSE

Grade: Certificate

Course | JustIT
06 - Sep - 2014

BTEC NATIONAL FIRST DIP. | A LEVELS

Grade: DISTINCTION

College | John Ruskin College
18 - July - 2008

TERRAFORM IN PRACTICE (QATIP) | COURSE

Grade: Certificate

School | QA
13 - Apr - 2023
